

Thermocouple Surface temperature sensor with self-adhesive backing

Model 11-00210, in stock

Construction

Wire thermocouple with exposed measuring junction. The junction is provided with self-adhesive backing of polyimid foil. The adhesive material is based on silicin.

Example of use

Temperature measuring on flat surfaces and on tubes. The exposed measuring junction offers very fast response time.

Maximum temperature

Complete pad: 175 °C
Wire: 480 °C

Article number

11-00210

Thermocouple

Type: K
Class: 1 (IEC 60584-2)
Measuring junction: exposed, bare leads

Signal connection

Glassfibre-insulated wire terminated by miniature male connector. Colour code as per IEC 60584-3.
