

Thermocouple Surface temperature sensor, magnetic

Model 11-00455, in stock

Construction

Thermocouple wire with magnetic contact surface.

Example of use

Surface temperature measurement at flat surfaces of metal.

Maximum temperature

Measuring probe: 80 °C
Wire: 250 °C

Measuring probe

Type: K
Measuring junction: Insulated

Signal connection

PTFE-insulated wire with miniature male connector.
Colour code as per IEC 60584-3.

Article number

11-00455
