

Thermapen superfast Thermometer for food industry

Model 11-35011, in stock

Description

Thermapen is a very quickly responding thermometer with indicator and sensor in the same unit. The thermometer is pocket size and the probe tip can be folded in and out like a clasp knife. The picture shows an intermediate position.

Applications

The thermometer is designed for the food industry: for institutional kitchens, restaurants and shops for such purposes as monitoring and controlling the cooling chain, and for the industry's food laboratories.

Accurate readings in less than 4 seconds

The Thermapen gives a temperature reading within ± 0.4 °C in the space of less than 4 seconds as long as the tip is sufficiently inserted into the liquid.

Hygienic

The Thermapen can be washed for good hygiene.

More colours

The Thermapen is available in several colours for separate use. Minimum order quantity for other colours than yellow is 10 pieces.

Technical specification

Measuring range	-49.9 to 299.9 °C
Resolution	0.1 °C or 1.0 °C. to be chosen
Accuracy	± 0.4 °C (-49.9 to 199.9 °C) else ± 1.0 °C
Probe diameter	1.8 mm
Battery	2x3 V CR2032 lithium coin cell
Battery life	1500 h
Display	14.3 mm LCD
Dimensions	19 x 47 x 153 mm (folded in)
Probe angle	180°
Vikt	97 g
Färg	Yellow

Part number: 11-35011
