

Thermocouple connector for terminal head

Model 6920000

Design

Connector according to EN 50212:2020.
Delivered with thread and connecting wire.

Example of use

Mounting in terminal head.

Max. temp.

Connector : 200 °C
Connecting wire : 200 °C

Note that junctions should always be placed as close to room temperature as possible.

Material

Contact housing: thermoplastic
Pin and connecting wire: thermocouple material
Insulating material wire: FEP
Inner conductor area: AWG 24 (0.2 mm²)
Thread: metal

Connection

Prepared for screw connection on terminal block.

Thread (G)

M20x1.5
Alternative thread on separate request.

Color code
